

Putting It All Together

#Project

You are asked to implement an e-commerce website where sellers and buyers can login and interact with each other.

A- Sellers:

- Ability to signup and login
- Ability to add new products
- Ability to remove products (BONUS)
- Ability to edit products (BONUS)
- Ability to check the monthly revenue (BONUS)

B- Buyers:

- Ability to signup and login
- Ability to browse products
- Ability to buy any product (without checkout)
- Ability to like a product (favorite)
- Ability to click on a product to see details (single product page - BONUS)

Your website should meet the minimum UI/UX standards. If I don't like your website, you will get an F 😊

Grading:

- **UI/UX:** 15%
- **JS/jQuery:** 25%
- **PHP/MYSQL:** 25%
- **Security:** 20%
- **Database Architecture:** 15%

Deliverables:

- ER Diagram
- GitHub Repo

Happy Coding :D
